

Should work with all SmartCraft compatible engines.

- View accurate SmartCraft digital engine data such as **RPM, engine temperature, battery voltage, engine hours, fuel consumption, and more.**

- View GPS Speed from the mobile device, which also captures top speed performance.
- View Fuel Management details such as Fuel Remaining (when you record fuel added using your app.) Information displayed includes Fuel Used and Time to Empty.
- Other features include: maintenance reminders, maintenance details, and engine fault code information.

Maintenance

- Blue icon on engine screen will pop up when maintenance is due
- Maintenance can be logged by selecting the item and then selecting Log Maintenance
- Maintenance is stored on the phone and can be viewed in the calendar
- Press and hold on the list and different types of sorting is available.
- Color of the hour ring will change from green to red when down to 10 hours
- Maintenance on the app is completely separate from the Maintenance feature available on some SmartCraft gauges.

FAULTS

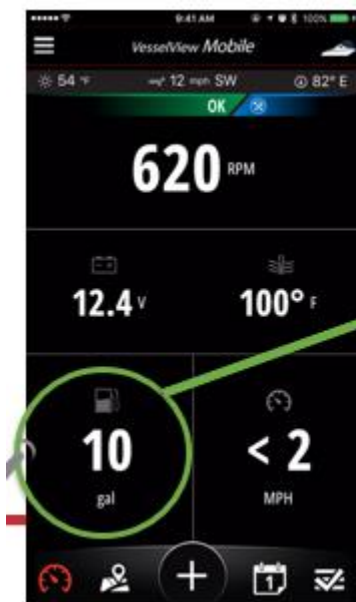

- Detailed fault information requires that the user is a) logged in to VesselView Mobile and b) has access to the internet.
- Engine faults only (No CCM, TVM, etc faults)
- Fault information is cached on the phone. Should a fault reoccur, the details will appear without a current cloud connection and regardless of login state.
- All VVMobile faults will eventually be in UFC format. This includes engines that do not traditionally display UFC.
- On early 2000's engines, you may see faults due to optional sensors that may or may not be installed on your engine. These faults must be set to Silent to stop the notifications

Weather and Heading

Fuel

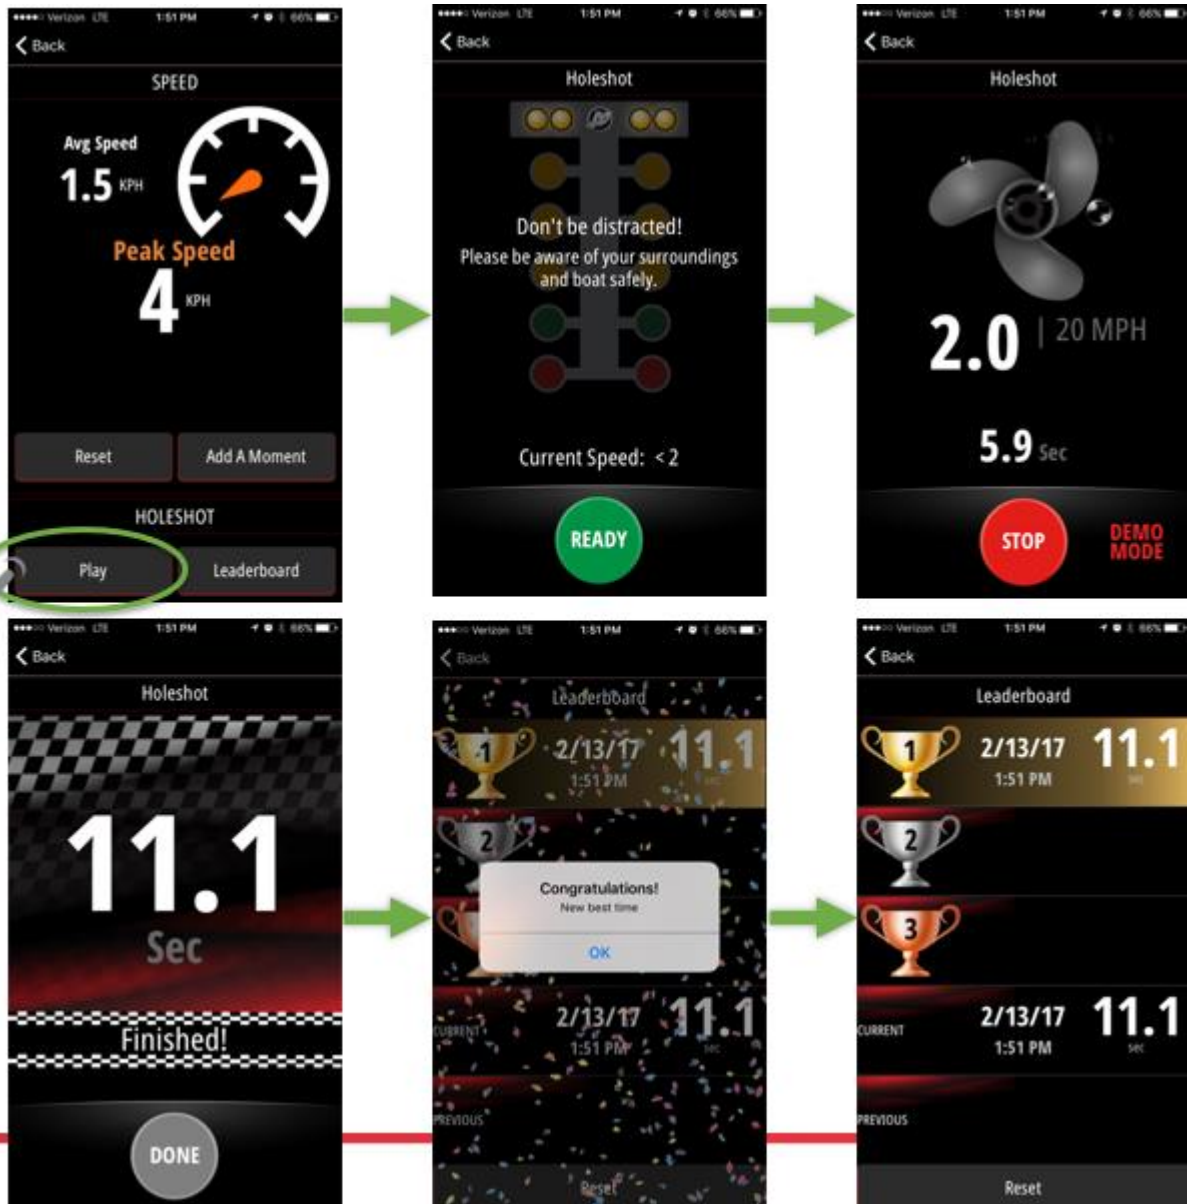

Speed

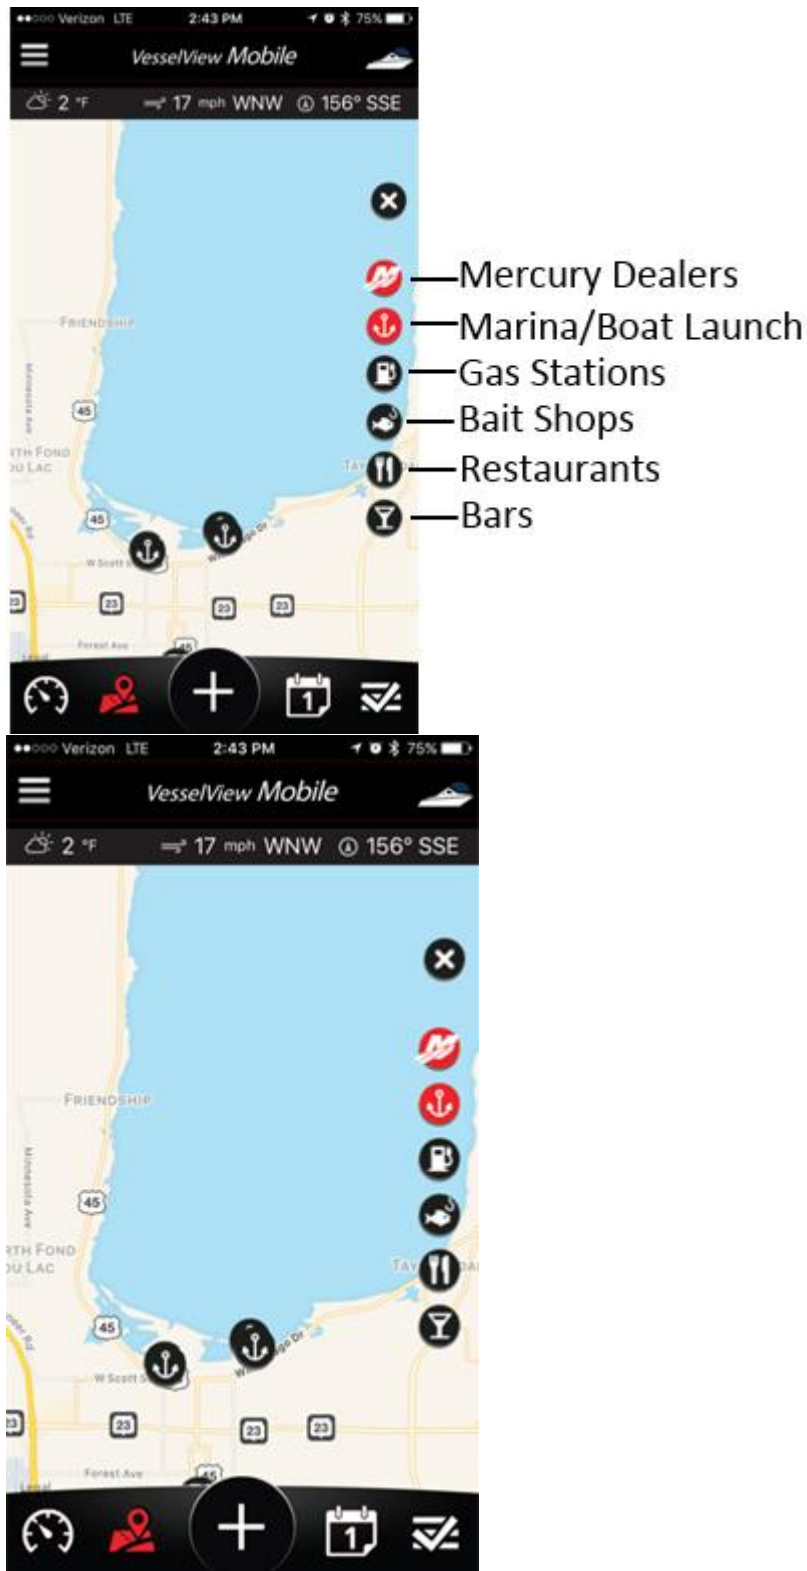

Holeshot

- Holeshot records the time it takes you to go from 0-20mph

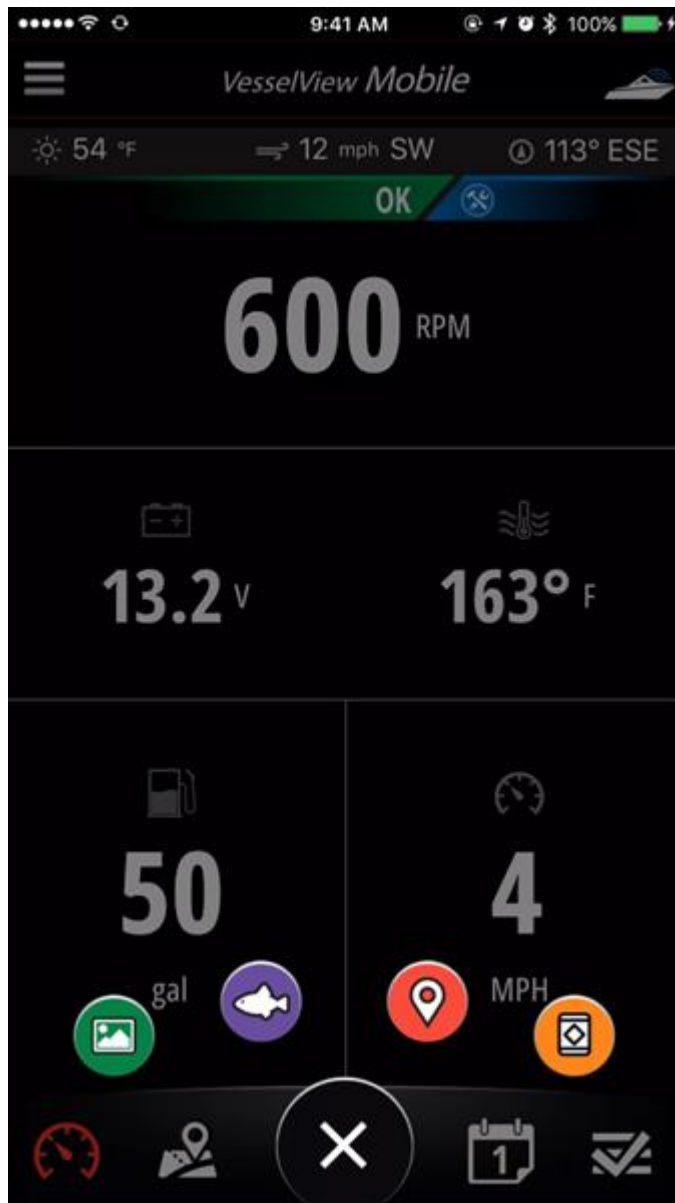

Map

Moments

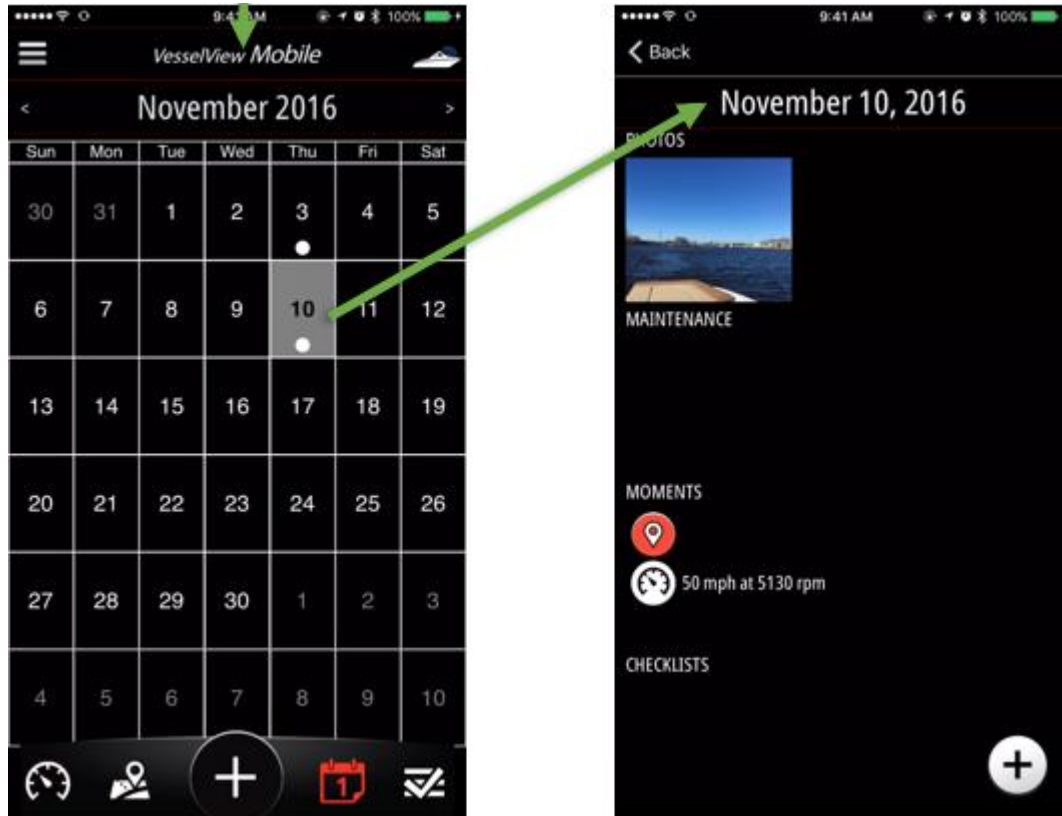

- There are 4 different Moments that can be captured
 - Picture
 - Catch
 - Location
 - Hazard
- Saved Moments appear on the Calendar in the app
- Photos will be saved to the phone
- Saved Moments include your location. Your location is not shared with anyone unless you Share a Moment.

CALENDAR

- The calendar shows which days have an event with a white circle.
- Tap the day to see the maintenance, moment, or checklists from that day.

- Tap any previous day to add a new entry for that day.

Checklists

- There are four default checklists that are in the app. These can be modified or deleted
- A custom checklist can be created.
- Checking off the boxes will complete the checklist and save it in the calendar.
